

Questions for peer review (step 5)

We would appreciate your general comments on the webpage. In particular regarding:

- Relevance
 - o Is the information sufficient in order to make a decision about screening participation?
 - o Is there too much/too little information?
- Usability
 - o Is a webpage suitable?
 - o Would you use (citizens)/recommend (healthcare professionals) a webpage for screening information purposes?
- Readability
 - o Does the text make sense to the targeted population (50-74-year-olds)?
 - o Are sentences too formal or sufficiently easy to understand?
- Design
 - o Is the webpage easy to navigate?
 - o Is it intuitive to use?
 - o Are any functions problematic or ineffective?
