Correction of: <https://formative.jmir.org/2025/1/e77644/>

(*JMIR Form Res* 2026;10:e92848) doi: [10.2196/92848](https://doi.org/10.2196/92848)

In “Characterization of Post-Viral Infection Behaviors Among Patients With Long COVID: Prospective, Observational, Longitudinal Cohort Analyses of Fitbit Data and Patient-Reported Outcomes”, the authors made one correction.

In the abstract, the sentence on longitudinal results has been amended to replace “MVPA-inactive” with “MVPA-active” and “decreased” with “statistically less improvements.”

In the abstract, the following sentence was revised:

Longitudinal analysis found that MVPA-inactive patients showed a decreased ability to participate in social roles (estimated group difference=−4.21 T-score points over 3 months, 95% CI −6.64 to −1.78, P<.001) and a higher intensity of sleep symptoms (estimated group difference=2.06 severity score points over 3 months, 95% CI 0.40 to 3.71, P=.02) over time.

The sentence now reads:

Longitudinal analysis found that MVPA-active patients had statistically less improvements in the ability to participate in social roles (estimated group difference=−4.21 T-score points over 3 months, 95% CI −6.64 to −1.78, P<.001) and the intensity of sleep symptoms (estimated group difference=2.06 severity score points over 3 months, 95% CI 0.40 to 3.71, P=.02) over time.

The correction will appear in the online version of the paper on the JMIR Publications website, together with the publication of this correction notice. Because this was made after submission to PubMed, PubMed Central, and other full-text repositories, the corrected article has also been resubmitted to those repositories.

This is a non-peer-reviewed article. Submitted 04.Feb.2026; accepted 10.Feb.2026; published 18.Feb.2026.
